

Loft Ladders

Our loft ladder is made of solid wood pine. The unique door spring opening mechanism is designed in such a way that it does not hinder your access to the loft. It's easy to use, light weight yet durable, strong and very functional.

-

The Loft Ladder is a 3 or 4 part folding ladder (depending on ceiling height) and is designed to provide easy, comfortable, and safe access to your loft space. When folded, it is 'hidden' in the ceiling, freeing space inside the room. Safety and ease of access is considered at every stage by the manufacturer - steps have a wide tread and there is a side handle to help keep your balance and footing.

-

We work with a team of highly skilled and qualified fitters who hold their own liability insurance whilst in your home - all this ensures we maintain our reputation for exceptional quality, speed of fitting and minimal disruption in your home.

-

We will have a loft ladder on display at our showroom soon, so you can see and try this for yourself. In the meantime, for further information pop in and see us or call us to arrange a free measure and quote.

-

Looking for more space?

-

Increase your storage space with one of our quality wooden loft ladders. With a smooth & safe retractable system and wide steps you'll be able to access an abundance of space in your home as often as you like. Professionally fitted in a few hours with minimal mess & disruption.

-

From only £350, this really is a cost effective and affordable way of increasing the space available to you in your home. The cost includes the ladder, opening of existing access hatch and fitting. Boarding, lighting or re-location of the hatch also available at an additional cost.

-

Ladder and workmanship guaranteed - as standard.
