

## Baths Range - Trojan

As one of the largest manufacturers in the UK of acrylic baths, Trojan take unprecedented pride in each one of their baths. From design conception to the launch of a new bath. Trojan ensure that each quality check reaches their expectations. Most models have a choice of 5mm or 8mm thickness and the Trojan baths also come with a Trojan-Cast option...

Trojancast is an outstanding heavily reinforced bath, giving it all the characteristics normally only associated with a cast iron bath. Trojancast adds extra strength and rigidity to the bath, and with its unique insulating properties also keeps your bathing water warmer for longer.
