

Baths Range - EuroCompact

Relatively new to the UK market, this collection offers you a wide range of contemporary styling with some very useful sizes and shapes if you are looking for something a little different. The production style and quality checks when producing this range are second to none, and the glass fibre backing for the bath is thicker and heavier than conventional baths, thus giving extra strength and rigidity to the bath.

-

This collection offers you a European leg set system which gives further rigidity when fitting the bath in situ, and also includes wall brackets which will enable the bath to be also fitted to the wall for that extra level of stability. During the manufacturing process each bath has additional resin and fibre glass spray added to the exterior to add further strength and insulation to the bath.
